# The Scientific Revolution: Evidence & Arguments

## Table of Contents

Preface: A Tribunal Called into Question  
General Introduction: A Philosophic Family in Limbo

### Chapter 1) The Cosmos: Theories of Everything

#### 1) Introduction: The Greek Legacy

**Primary Selections:**

1-P1) Plato, “Cosmos (Timaeus)” (c. 360 B.C.E.)
1-P2) Plato, “On the Human Soul” (c. 360 B.C.E.)
1-P3) Pseudo-Aristotle, “On the Cosmos” (after 300 B.C.E.)
1-P4) Hermes Trismegistus, “Corpus Hermeticum, & Mind to Hermes” (ca. 200)
1-P5) Giordano Bruno, “Expulsion of the Triumphant Beast” (1584)
1-P6) René Descartes, “Vortices (Principles of Philosophy)” (1644)
1-P7) Isaac Newton, “General Scholium” & “System of the World” (1687/1729)
1-P8) W. G. Leibniz and Samuel Clarke, “Correspondence” (1715)
1-P9) Immanuel Kant, “Natural History of the Heavens” (1755)

**Secondary Selections:**

1-S1) Lewis, C. S. “The Heavens”
1-S2) Yates, Frances A. "The Hermetic Tradition in the Renaissance"
1-S3) Debus, Allen G. “Robert Fludd and the Use of Gilbert's 'de Magnete' in the Weapon-Salve Controversy”
1-S4) Bertoloni Meli, Dominico. “Caroline, Leibniz, and Clarke”
1-S5) Koyré, Alexandre. “The Significance of the Newtonian Synthesis”

### Chapter 2) Euclidean Geometry: Exemplar of True & Certain Knowledge

#### 2) Introduction: Number, Form, and the Promise of Mixed Mathematics

**Primary Selections:**

2-P1) Iamblichus, “On the Pythagorean Life” (c. 320)
2-P2) Euclid, “Elements” (c. 300 B.C.E.)
2-P3) Leon Battista Alberti, “On Painting” (1436)
2-P4) Nicholas of Cusa, “Learned Ignorance” (1440)
2-P5) John Dee, “Mathematical Preface” (1570)
2-P7) René Descani, “The Geometry” (1637)

**Secondary Selections:**

2-S1) Swerdlow, Noel M. “The Recovery of the Exact Sciences of Antiquity: Mathematics, Astronomy, Geography”
2-S2) Debus, Allen G. “Introduction: John Dee's *Preface* to Euclid's *Elements*”
Chapter 3) Ptolemaic Astronomy: Mathematical Theories of the Heavens
3) Introduction: From Geocentric to Heliocentric Planetary Theories
Primary Selections:
3-P1) Claudius Ptolemy, “Almagest” (ca. 150)
3-P2) Nicole Oresme, “The Earth’s Diurnal Rotation” (c. 1360)
3-P3) Nicolas Copernicus, “On the Revolution of Heavenly Spheres” (1543)
3-P4) Tycho Brahe, “Phenomena of the Celestial World” (1588)
3-P5) Johannes Kepler, “New Astronomy” (1609)
3-P6) Galileo Galilei, “Starry Messenger” (1610)
3-P7) Johannes Kepler, “Harmony of the World, Book V” (1619)
3-P8) Robert Hooke, “Motion of the Earth from Observation” (1674)
3-P9) Isaac Newton, “Mathematical Principles of Natural Philosophy” (1687)
Secondary Selections:
3-S1) Swerdlow, Noel and Otto Neugebauer. “Arabic Astronomy and the Maragha School” & “Early Period to the Writing of the Commentarius”
3-S2) Holton, Gerald. "Johannes Kepler's Universe: Its Physics and Metaphysics"
3-S3) Biagioli, Mario. “Replication or Monopoly? The Economies of Invention and Discovery in Galileo’s Observations of 1610”

Chapter 4) Ptolemaic Geography: Portraiture of the Earth’s Surface
4) Introduction: The Ship as an Instrument of Science
Primary Selections:
4-P1) Ptolemy, “Geography” (ca. 150)
4-P2) Amerigo Vespucci, “Letters from a New World” (1503)
4-P3) Sebastian Münster, “Cosmography” (1540/1592)
4-P4) Eugenio de Salazar, “Minor Horrors of the Sea” (1573)
4-P5) Gerhard Mercator, “Atlas” (1595)
4-P6) Bernhard Varenius, “System of General Geography” (1650)
Secondary Selections:
4-S1) Goodman, David. "Iberian Science: Navigation, Empire and Counter-Reformation"
4-S2) Livingstone, David N. "Geography, Tradition and the Scientific Revolution"

Chapter 5) Ptolemaic Astrology: Linking Heaven & Earth
5) Introduction: Astrologers & Priests: Competing Interpreters of Heaven’s Messages
Primary Selections:
5-P1) Ptolemy, “Tetrabiblos” (ca. 150)
5-P2) Julius Firmicus, “Matheseos Libri VIII” (ca. 350)
5-P3) Michael Servetus, “In Favor of Astrology” (1538)
5-P4) Johannes Kepler, “Harmony of the World” (1619)
5-P5) Pierre Gassendi, “Vanity of Judiciary Astrology” (1650)
5-P6) Anon., “The Bloody Almanack” (1666)

Secondary Selections:
5-S1) Thomas, Keith. “Astrology: Its Practice and Extent”
5-S2) Field, J. V. “Astrology in Kepler’s Cosmology”

Chapter 6) Galenic Medicine: Anatomy, Physiology, & Disease
6) Introduction: Mapping the Body, Reading Its Meanings
Primary Selections:
6-P1) Galen, “Anatomical Procedures” (ca. 180)
6-P2) Galen, “Arteries” (ca. 180)
6-P3) Galen, “On the Use of the Pulse” (ca. 180)
6-P4) Galen, “Reproductive Tract” (ca. 180)
6-P5) Avicenna, “Medical Canon” (c. 1020)
6-P6) Ulrich von Hutten, “French Disease” (1519)
6-P7) Baldasar Heseler, “Vesalius’ Anatomy” (1540)
6-P8) Andreas Vesalius, “De Fabrica” (1543)
6-P9) Paracelsus, “Miners’ Sickness” (1567)
6-P10) William Harvey, “Circulation of the Blood” (1628)
6-P11) Robert Fludd, “The Weapon-Salve” (1631)

Secondary Selections:
6-S1) Cunningham, Andrew, “The Anatomical Renaissance”
6-S2) Park, Katharine. “Criminal & Saintly Body: Autopsy & Dissection in Renaissance Italy”
6-S3) Pagel, Walter. “Vesalius and Paracelsus”
6-S4) Wear, Andrew. “The Heart and Blood from Vesalius to Harvey”

Chapter 7) Plinean Natural History
7) Introduction: Natural Order and Its Uses
Primary Selections:
7-P1) Aristotle, “On the Generation of Animals” (ca. 325 B.C.E.)
7-P2) Pliny, “Natural History” (ca. 70)
7-P3) Ambroise Paré, “On Monsters and Marvels” (1575)
7-P4) José de Acosta, “Peopling of the New World” (1590)
7-P5) Konrad Gesner/Edward Topsell “History of Four-Footed Beasts” (1658)
7-P6) Athanasius Kircher, “China Illustrata” (1667)
7-P7) William Wotton, “Ancient & Modern Natural History” (1690)
7-P8) Carolus Linnaeus, The System of Nature (1735)

Secondary Selections:
7-S1) Tuana, Nancy. “The Weaker Seed: The Sexist Bias of Reproductive Theory”
7-S3) Ashworth, William. “Emblematic Natural History of the Renaissance”
Chapter 8) Scripture & The ‘New Sciences’
8) Introduction: The Authority of Scripture & the Evidence of Nature
Primary Selections:
8-P1) Old Testament ("Genesis, Job, Psalms, Ecclesiastes")
8-P2) St. Augustine, “The Real Meaning of Genesis” (c. 425)
8-P3) Johannes Kepler "Copernicus & Scripture (New Astronomy)" (1609)
8-P4) Galileo Affair (1613-33)
  - Castelli Letter (1613)
  - Galileo’s Letter to Castelli (1613)
  - Bellarmine to Foscarini (1615)
  - Caccini’s Deposition (1615)
  - Inquisition Minutes (15 February 1616)
  - Inquisition, Special Injunction (26 February 1616)
  - Inquisition Minutes (3 March 1616)
  - Decree of the Index (5 March 1616)
  - Bellarmine’s Certificate (26 May 1616)
  - Galileo, “Preface to ‘Dialogue’” (1632)
  - Inquisition, “Sentence and Abjuration” (22 June 1633)
8-P5) Blaise Pascal, "Religious Skepticism" (16??)
8-P6) W. G. Leibniz, “On Copernicanism the Relativity of Motion” (1689)
8-P7) Thomas Burnet, “Sacred Theory of the Earth” (1691)
8-P8) Isaac Newton, "Letters to Bentley" (1692-93)
8-P9) Immanuel Kant, “Preface to Natural History of the Heavens” (1755)

Secondary Selections:
8-S1) Shea, William. “Galileo and the Church”
8-S2) Merton, Robert K. “The Puritan Spur to Science”
8-S3) Harris, Steven J. “Transposing the ‘Merton Thesis’: Apostolic Spiritual-
ity and the Establishment of the Jesuit Scientific Tradition”
8-S4) Russell, John L., S.J. “Catholic Astronomers and the Copernican
System after the Condemnation of Galileo”
8-S5) Jacob, Margaret. “Christianity and the Newtonian Worldview”

Chapter 9) Theories of Matter, Space, & Place
9) Introduction: Competing Intelligibilities: From Matter and Form to Matter and
  Motion
Primary Selections:
9-P1) Aristotle, “Physis, Book IV” (c. 325 B.C.E.)
9-P2) Lucretius, “Nature of Things” (ca. 60 B.C.E.)
9-P3) Coimbra Commentators, “Extra-cosmic Void Space” (1602)
9-P4) René Descartes, “Principles of Philosophy” (1644)
9-P5) Pierre Gassendi & Walter Charleton, “Atomism” (1654)
9-P6) Robert Boyle, “Skeptical Chemist” (1661)
9-P7) Robert Boyle, “Origin of Qualities & Forms” (1666)
9-P8) Isaac Newton, “Query 31, Opticks” (1704)
9-P9) G.W. Leibniz, “New System of . . . Substances” (1695)

Secondary Selections:
9-S1) Grant, Edward. “Aristotelianism and the Longevity of the Medieval World View”
9-S3) Bennett, J. A. “The Mechanics’ Philosophy and the Mechanical Philosophy”
9-S4) Newman, William R. “The Occult and the Manifest among the Alchemists”

Chapter 10) Epistemology & Methodology: Sources & Standards of Scientific Knowledge
10) Introduction - Skepticism and the Search for Certainty
Primary Selections:
10-P1) Aristotle, “Metaphysics & Physics,” (c. 325 B.C.E.)
10-P2) Francisco Sanches, “That Nothing is Known” (1581)
10-P3) Francis Bacon, “Four Idols” (New Organon) (1620)
10-P4) Galileo Galilei, “The Assayer” (1624)
10-P5) René Descartes, “Meditations on First Philosophy” (1641)
10-P6) Blaise Pascal, “Geometrical Mind”
10-P7) Isaac Newton, “Rules for the Study of Natural Philosophy” (1687)
Secondary Selections:
10-S1) Sargent, Rose-Mary. “Bacon as an advocate for cooperative scientific research,”
10-S2) Wallace, William A. “Aristotelian Influences on Galileo’s Thought”
10-S3) Ariew, Roger. “Descartes among the Scholastics”

Chapter 11) Experimental Philosophy
11) Introduction: The Call to “Active Philosophy”
Primary Selections:
11-P1) Giambattista della Porta, “Natural Magic” (1589)
11-P2) William Gilbert, “On the Magnet” (1600)
11-P3) Francis Bacon, “On Heat” (New Organon) (1620)
11-P4) Galileo Galilei, “Ship Experiment” (1632)
11-P5) Otto von Guericke, “Magdeburg Experiment” (1657)
11-P6) Robert Boyle, “Spring and Weight of Air” (1662)
11-P7) Margaret Cavendish, “Physical Opinions” (1666)
Secondary Selections:
11-S1) Hansen, Bert. “The Complementarity of Science and Magic before the Scientific Revolution”
11-S2) Dear, Peter. “Experience and Jesuit Mathematical Science: The Practical Importance of Methodology”
11-S3) Wallace, William A. “Galileo and Aristotle in the Dialogo”
Chapter 12) Women and Gender in the Study of Nature

12) Introduction: The Gendering of Nature and Natural Knowledge

Primary Selections:
12-P1) Margaret Cavendish, “New Blazing World”
12-P2) Anne Conway [?]
12-P3) Fontenelle, “Conversation on the Plurality of Worlds”
12-P4) Emilie du Châtelet [?]
12-P5) Laura Bassi [?]

Secondary Selections:

Chapter 13) Ancients & Moderns

13) Introduction - The Complexity of Change

Primary Selections:
13-P1) Blaise Pascal, “Reason & Evidence (On Vacuum)”
13-P2) Walter Charleton, “Four General Orders” (1654)
13-P3) William Wotton, “Ancient & Modern Natural History” (1690)
13-P4) John Craig, “Ancients & Moderns in Mathematics” (1694)
13-P5) W. G. Leibniz, “Against Barbaric Physics” (1710-16?)
13-P6) Voltaire, “Bacon, Descartes, Newton” (1733)

Secondary Selections:
13-S1) Barker, Peter & Roger Ariew. “Introduction: Revolution and Continuity”
13-S3) Gingerich, Owen. “‘Crisis’ versus Aesthetics in the Copernican Revolution”
13-S4) Hatfield, Gary. “Was the Scientific Revolution Really a Revolution in Science?”
13-S5) Koyré, Alexandre. "Galileo and the Scientific Revolution of the Seventeenth Century"
13-S6) Kuhn, Thomas S. “What are Scientific Revolutions?”
13-S7) Rashed, R. “Science as a Western Phenomenon”
13-S8) Schuster, John A. "The Scientific Revolution"

Pathways
Pathway-1) Reading in Stages: Recovery & Restoration of Classics, Reformation of Natural Knowledge, Scientific Revolution & Consolidation
Pathway-2) Gender, Science, and the Natural Order
Pathway-3) “Number, Weight, Measure”: God as Geometer
Pathway-4) The ‘New Science’ in England
Pathway-5) Cosmography as a Central Science
Pathway-6) Science in the Church
Pathway-7) National Traditions in Natural Philosophy
Pathway-8) Gothic Continuities

Appendix 1: Glossary of Terms
Appendix 2: Time Line
